

Job Description: Java Spring Boot Developer

What You'll Do:

We are seeking a highly skilled and motivated Java Spring Boot Developer to join our team. You will be responsible for developing and maintaining microservices using Java Spring Boot. You will collaborate with cross-functional teams to design, build, and implement scalable and reliable software solutions. Your role will include:

- Developing and maintaining microservices with Java Spring Boot.
- Designing and implementing RESTful APIs.
- Working with Hibernate and JPA for efficient database management.
- Utilizing PostgreSQL for database operations.
- Collaborating with cross-functional teams to define, design, and ship new features.
- Troubleshooting and debugging to optimize performance.
- Ensuring code quality through unit testing and continuous integration.

Required Candidate Profile:

- Proven experience with a focus on Java and Spring Boot.
- Strong understanding of Microservices architecture.
- Experience with Hibernate and JPA for database management.
- Proficiency in developing REST APIs.
- Knowledge of PostgreSQL and Linux.
- Ability to work collaboratively in a team environment.
- Strong problem-solving skills and attention to detail.
- Excellent communication and interpersonal skills.

If you are passionate about technology and eager to work on innovative projects, we would love to hear from you. Apply now and join our team to help shape the future of our software solutions!
